WELCOME TO PROPAC

Company Profile

Propack Industries is a manufacturer of Printed Multi layered Flexible packaging in form of Rolls and bags. Propack is one of the largest manufacturer of PE Bags in India and has a large variety of bags for different applications covering a large array of applications. Our client list include a lot of Multi-national companies like Johnson & Johnson, Kimberly Clarke, ITC, MRF to name a few. We also have exports in to the United States and African markets catering to the hospitality and food industry respectively.

We have state of the art German Flexo printing facility and Film extrusion lines with a total capacity of 4800 TPA. We have a largest variety of Bags including Wicket Bags with handle and perforation, Side Gusset bags, Side/Bottom Seal bags with gusset, side seal and bottom seal bags with loop handle and many more.

Our plant is certified and has the latest equipment and QA systems to supply zero defect material to customers. The certifications include ISO 14001 and ISO 9001.

Propack's USP is to collaborate with its customers on developing new packaging solutions for them which are more cost effective and sustainable. We supply bio degradable and compostable films/bags which is our commitment towards taking the world closer to sustainable packaging.

5 Blown film extrusion lines.

CI Flexographic Printing Press

Propack's Central Impression Printing Press (Miralflex CM) showcases Windmoller & Holscher's exquisite design experience. They are world leaders in manufacturing state-of-the-art flexography printing press.

The CI press can be used to print for all major applications using plastic films, paper, aluminium foils and laminates with widths of up to 1270 mm (50") and print repeats from 370 – 800 mm (14.5" – 31.5"). It can print up to 8 colours on each side at a maximum speed of 370 m/min. The above feature can help you design co-branded printed bags/films. It provides fully automatic features, resulting in significant benefits such as fast production start-up, reproducible settings resulting into higher print quality and consistency in shades. Our CI printing unit can print attractive and complex designs with perfect registration which will increase the brand value of your product in the market place!

Feel free to ask us for samples! Our printing experts can help you out with any queries that you may have.

Bag-Making Machine

The customer driven product optimizations combined with the use of state-of-the-art technologies, guarantees the best results for demanding and individual customer requirements.

- High Speed Automatic Wicketers with Servo Motor Drive System
- Side Seal and bottom Seal bag making machines.
